

This is a thing that is very hot.

This is a thing that is bigger than 100 earth's.

This is not the sun.

You can see this in the sky.

The color of this thing is orange.

The name for this thing is very old.

This thing has many friends, like Europa, Ganymede, and Callisto.

This thing has many clouds.

This thing has a big, mean, orange, eye.

You can find many storms on this thing.

No one has ever been able to see through the clouds of this thing.

Six years ago many comets hit this thing.
